REPAIRS AND ADJUSTMENTS: No repairs or adjustments.

NOTE 1: This tractor has an engine control feature that allows the engine to run in a "boosted" mode, increased power level, when the tractor is operated during stationary PTO operations and when the travelling speed exceeds 9 mph (15 kph).

NOTE 2: The performance figures on this report are the result of replacing the electronic engine control module of the Massey Ferguson 6716S Dyna VT with the Massey Ferguson 6714S Dyna VT module.

REMARKS: All test results were determined from observed data obtained in accordance with official OECD test procedures. The performance figures on this summary were taken from a test conducted under the OECD Code 2 test procedure.

We, the undersigned, certify that this is a true summary of data from OECD Report No. **3033**, Nebraska Summary 1120, February 23, 2018.
